

Learning Outcome Based Curriculum (LOCF) for

Geography-B.Sc (Hons.)

**Undergraduate Programme (CBCS)
w.e.f. Academic Session 2020-21**

**Kazi Nazrul University
Asansol, West Bengal**

PART I

INTRODUCTION

Learning Outcomes based Curriculum Framework (LOCF) for Geography under CBCS

1. Introduction

Geography has evolved as a discipline between human and physical sciences. Geography not only focuses on the physical aspects of the earth systems and processes but also seeks to understand the human societies, social systems and processes. Geography in true sense has emerged as a trans-disciplinary subject integrating the study of nature and society, the regional diversity with the concepts of the space and time. It has been able to provide the overview of transformation of rural ecology to globalized cultural landscape at several spatial level.

Geography is therefore a study of

- Village Ecology to Urban Regional Studies
- Qualitative Techniques and Spatial Information Technology
- Global to Micro-level Community Perception Approach

It is essential to focus on the current socio-spatial problems, issues and challenges to aware students application of geography in addressing the environmental problems and developmental issues. It is also essential to deliver ancient geographical knowledge to address the current local and global problems. In the context of global challenges, geography have to be studied from the multifaceted and dynamic perspective. It is important for the policy makers to consider the geo-spatial aspects with references to the location and in context of the best utilization of natural resources and public goods. It is further expected that if the knowledge of geography will be instrumental in regional and national development.

2. Learning Outcomes based Approach to Curriculum Planning

Learning Outcomes based Curriculum Framework (LOCF) for geography curriculum revision incorporates dynamic processes including fundamental and modern techniques, contemporary paradigms such as global initiatives like Sustainable Development Goals (SDGs), Disaster Risk Reduction (DRR), Paris Climate Action and national initiatives like smart cities, Securities of food, water, energy, human health and livelihood, biodiversity, and disaster management. The approaches are to make geography more scientific and societal-need oriented that could be the panacea of India's developmental challenges. Geography uses scientific knowledge with the current focus that includes spatio-temporal analysis, skill development, GI Science sustainable development and human security. At the same time it also addresses the challenges like mining industries, environmental and land degradation.

2.1 Nature and Extent of the B.Sc. (Hons.) Programme

Geography curriculum inculcates knowledge of essential concepts of physical and human geography together with appropriate techniques using lectures, tutorials, group discussions, presentations, assignment evaluation, lab work and field visits. Thus, pedagogy process includes:

- Identifying and explaining the physical and cultural characteristics globally and processes at varied spatio-temporal contexts.
- Understanding human-environment and nature-society interactions as well as various global environmental challenges.
- Analysing geographic information by using geo-spatial technologies.
- Responding towards the global, national and local challenges and formulating proper remedial plan.

2.2 Aims B.Sc. (Hons.) Programme

Four distinct and new learning outcomes have been incorporated from each Course such as:

- Appreciate the relevance of geographical knowledge to everyday life.
- Demonstrate the ability to communicate geographic information by utilising both lecture and practical exercises.
- Inculcate the ability to evaluate and solve geographical problems effectively.
- Demonstrate the skills in using geographical research tools including spatial statistics, cartography, remote sensing, GIS, GNSS and GIScience.
- Based on the field knowledge and advanced technologies, the students should be able to understand the on-going geographical problems in different regions and levels with appropriate pragmatic solutions.

3. Graduate Attributes in Geography

The curriculum uses CBCS framework and organises under Core Course, Skill Enhancement Course, Elective - Discipline Specific and Elective - Generic Courses. The core courses cover key areas of geography about which all students should have basic knowledge. These courses are grouped as follows:

- A. Theory Courses: These courses build up the theoretical and conceptual foundations of geography.
- B. Practical Courses: Three courses on Statistical Techniques in Spatial Analysis; Remote Sensing and Geographical Information System, GIScience and Research Methods and Fieldwork in Geography will strengthen the methodological and practical foundations of geography.
- C. Regional Approach: Such courses focus on World Geography, Geography of India / West Bengal and local geographical aspects of Durgapur-Raniganj-Asansol area.
- D. Application Oriented: This includes disaster management, climate change, tourism

geography, health and wellbeing, environmental degradation etc.

Each Course has three learning outcomes, five uniform contents and reading list incorporating a few Hindi books also wherever possible.

4. Qualification Descriptors for B.Sc. (Hons.) Program

The qualification descriptors for the B.Sc. (Hons.) program in Geography shall have the learning attributes such as field knowledge, use of advance tools and techniques for better comprehension of space and society etc. It also involves awareness among the students regarding the issues of different regions and socio-cultural aspects. The main qualification descriptors for the geography B.Sc. (Hons.) students are to develop the critical evaluation and understanding. Each Honours student in Geography should be able to;

- Demonstrate systematically geographical knowledge and understanding the theoretical as well as practical applications with understanding of various aspects related to heavy industries, mining, agriculture and urbanisation.
- Demonstrate the ability to understand the significance of geographical aspects in relation to development of the regions and minimizing regional inequalities.
- Demonstrate the ability and geographical thinking critically regarding rural and urban spaces and their day-to-day problems with the application of geographical knowledge.
- Students have to demonstrate their geographical knowledge acquired in the class and apply the same at local level.
- Recognise the scope of geography in terms of exploring the career opportunities, employment and life-long engagement in teaching and utilise the knowledge for publication for the future academic endeavors.

The students have to develop the ability through the theoretical and practical means for realising the Sustainable Development Goals (SDG) both in rural and urban spaces to minimize the differentials in developmental aspects.

5. The Programme Learning Outcomes B.Sc. (Hons.) Programme

The programme learning outcomes relating to B.Sc. (Hons.) Programme in geography:

- Demonstrating the understanding of basic concepts in geography.
- Demonstrating the coherent and systematic knowledge in the discipline of geography to deal with current issues and their solution.
- Display an ability to read and understand maps and topographic sheets to look at the various aspects on the space.
- Cultivate ability to evaluate critically the wider chain of network of spatial aspects from global to local level on various time scales as well.

- Recognize the skill development in Geographical studies programme as part of career avenues in various fields like teaching, research and administration.

5.1 Learning Outcomes

Three distinct and new learning outcomes have been incorporated from each course such as to:

1. Understand the relevance of geographical knowledge to everyday life.
2. Getting the ability to communicate geographic information utilizing both lecture and practical exercises.
3. Inculcate the ability to evaluate geographical problems effectively.
4. Exhibit the skill in using geographical research tools including spatial statistics, qualitative analysis, cartography, remote sensing, GIS, IRNSS and GIScience.

5.2 Course Level Learning Outcomes

The course level learning outcomes includes:

1. **Basic Concept:** The fundamental concepts and philosophical foundation of each course need to be discussed.
2. **Understanding Landscape:** An understanding of landscape at different levels needs to be discussed and understood for a thorough knowledge of spatial dimensions.
3. **Understanding Ecosystem Structure and Potential:** To comprehend the dynamic dimensions of human and ecosystem relationships.
4. **Human Perception and Behaviour:** Learning human perception and behaviour to acquire the geographical knowledge evolved over time, is essential to improve decision making process.
5. **Identification of Critical Problems and Issues:** Detection and identification of the critical problems and spatial issues are essential for sustainable development.
6. **Field Based Knowledge:** Field based knowledge is essential to understand the ground reality, spatial patterns and processes.
7. **Spatial Tools and Techniques:** The basics and applications of spatial tools and techniques are essential to make the studies more scientific and applicable.
8. **Statistical Techniques:** Use of statistical tools and techniques is essential for precise and objective geographic analysis and interpretation of complex phenomena.
9. **Applied Dimensions:** Identification of the critical problems and spatial issues form the core of the modern geography for various applications and decision making, including Surface and sub-surface Resources, Environment & Disaster Management, River Valley Planning, Industrial Hazards, Land Use Planning, and Urban and Regional Development together with Climate Change Mitigation and Adaptation, etc.
10. **Case Study based Analysis:** There is a need to understand the specificities of the problems in specific areas for their in-depth comprehension and solution. The case studies are essential, especially to find out the solutions to the lagging regions for their solutions based on firsthand information.
11. **Public Policy and Management:** Spatial aspects and dimensions are the integral parts in the policy making for sustainable regional development. Geographical knowledge needs to be inculcated for application and solutions of the various local, regional and national problems.

12. **Communication Skills:** Communication through models, analogue and digital maps, images and other geographical tools form the sound base for the dissemination of geographical information.

6. Course-Level Learning Outcomes Matrix

Outcomes	Core Subjects													
	1	2	3	4	5	6	7	8	9	10	11	12	13	14
Basic Concept	x	X	X	X	X	X	X	x	x	x	x	X	X	X
Understanding Landscape	x	X	X				X		X	X	X	X	X	X
Understanding Ecosystem structure and Potential			X		X		X	X	X	X	X	X		X
Human Perception and Behaviour			X				X	X	X			X	X	X
Identification of Critical Problems and Issues	X		X		X	X	X	X	X	X	X	X		X
Field Based Knowledge		X		X	X					X	x	X		X
Spatial Tools and Techniques		X		X		X				X		X		X
Statistical Techniques		X		X		X				X		X		X
Applied Dimensions	X	X	X	X	X	X		X	X	X	X	X		X
Case Study based Analysis		X	X		X	X			X	X	X	X		X
Public Policy and Management					X	X	X	X	X	X	X	X		X
Communication Skills	x	X	X	X	X	X	X	X	X	X	x	X	X	X

7. Geography Course Outcomes and SDGS

The global community has adopted the Sustainable Development Goals to ensure holistic and multifaceted development of human societies across the world. These goals adopted in 2015 were an ambitious upgradation of millennium development goals.

The Indian Geographical community aims to harness the trans-disciplinary nature of the subject and link it with sustainable development goals through a range of multi-dimensional core and elective papers.

8. Teaching Learning Processes

Learning Outcomes based Curriculum Framework (LOCF) for geography incorporates dynamic processes including fundamental and modern techniques, contemporary paradigms such as global initiatives like Sustainable Development Goals (SDGs), Disaster Risk Reduction (DRR), Paris Climate Action and national initiatives like smart cities, food security, water security, energy security, biodiversity, disaster management, human health and wellbeing and livelihood security. The approaches are to make geography more scientific and societal-need oriented that could be the panacea to India's development. Geography uses scientific knowledge with the present focus that includes spatio-temporal analysis, skill development, GIScience,

sustainable development and human security.

Learning is a challenging, engaging, and enjoyable activity. Learners should be encouraged to engage in a rigorous process of learning and self-discovery by adopting a highly focused and yet flexible approach to education. Each day learners should be encouraged to focus on key areas of the course and spend time on learning the course fundamentals and their application in life and society. In teaching and learning pedagogy, there should be a shift from domain or conclusions-based approach to the experiential or process-based approach.

Geography curriculum inculcates knowledge of essential concepts of physical and human geography together with appropriate techniques using lectures, tutorials, group discussion, presentation, assignment evaluation, lab work and field visits. Thus, pedagogy process includes:

- Identifying and explaining the physical and cultural characteristics globally and processes at varied spatio-temporal contexts.
- Understanding human-environment and nature-society interactions as well as various global environmental challenges.
- Analysing geographic information by using geo-spatial technologies.
- Responding towards the global and national initiatives.

Broad framework for teaching in the class includes:

1. Theory courses should have 6 hours per week for courses carrying 6 credits.
2. Tutorial group of each theory course should have a group size of 15 students.
3. Practical courses should have 12 hours per week for a group of 15 students.
4. Practical courses will not have tutorials.

The faculty should promote learning on a proportionate scale of 20:30:50 principle, where lectures (listening/hearing) constitute 20 per cent of the delivery; visuals (seeing) 30 per cent of the learning methods; and experience (doing/participating) 50 per cent. This ratio is subject to change as per institutional needs.

In order to achieve its objective of focused process based learning and holistic development, the Institution/University may use a variety of knowledge delivery methods:

1. Lectures

Lectures should be designed to provide the learners with interesting and fresh perspectives on the subject matter. Lectures should be interactive in a way that students work with their teachers to get new insights in the subject area, on which they can build their own bridges to higher learning.

2. Discussions

Discussions are critical components of learning, and can be used as a platform for students to be creative and critical with old and new ideas. Besides developing critiquing skills, arriving at consensus on various real life issues and discussion groups lead to innovative problem solving and, ultimately to success.

3. Lectures

Lectures should be designed to provide the learners with interesting and fresh perspectives on the subject matter. Lectures should be interactive in a way that students work with their teachers to get new insights in the subject area, on which they can build their own bridges to higher learning.

4. Discussions

Discussions are critical components of learning, and can be used as a platform for students to be creative and critical with old and new ideas. Besides developing critiquing skills, arriving at consensus on various real-life issues and discussion groups lead to innovative problem solving and, ultimately to success.

5. Life Skills:

Life skills provide students opportunities to understand real life situations and scenarios (i.e. coping with disaster), and solve challenges in a controlled environment or make use of them in simulating cultural experiences by locating/transposing them in new (local, regional, national and international) situations.

6. Case Studies:

Case studies, wherever possible, should be encouraged in order to challenge students to find creative solutions to complex problems of individual, community, society and various aspects of knowledge domain concerned.

7. Role Playing

Assuming various roles, as in real life, is the key to understanding and learning. Students are challenged to make strategic decisions through role-plays, and to analyze the impact of these decisions. For this purpose, incidents from literary texts may also be used.

8. Team Work

Positive collaboration in the form of teamwork is critical in the classroom environment, for which outcomes. In the process of teamwork, learners will acquire the skills of managing knowledge acquisition and other collaborative learners, thereby understanding how to incorporate and balance personalities.

9. Study Tours/Field Visits:

Study Tours/ Field trips provide opportunities to the learners to test their in-class learning in real life situations as well as to understand the functional diversity in the learning spaces. These may include visits to sites of knowledge creation, preservation, dissemination and application. Institutions may devise their own methods to substitute/modify this aspect.

10. Academics-Industries Interface:

The course curriculum of B.A/BSc. (Hons.) should encourage students for closer interaction with industries/collieries/corporate/research institutes, etc. for at least one week internship and training.

PART II

STRUCTURE OF B.Sc. GEOGRAPHY

9. Introduction

The curriculum uses CBCS framework and organizes under Core Courses, Skill Enhancement Course, Discipline Specific Elective, Generic Elective Courses and Ability Enhancement Compulsory Courses. The core courses cover key areas of geography about which all students should have basic knowledge. These courses are grouped as follows:

- **Theory** – These courses build up the theoretical and conceptual foundations of geography.
- **Practical** – Three courses on Statistical Techniques in Spatial Analysis; Remote Sensing and GIS, GIScience and Research Methods and Fieldwork in Geography, Thematic mapping, will strengthen the methodological and practical foundations of geography.
- **Regional Approach** – Such courses focus on Geography of India / different states.
- **Application Oriented** – This includes disaster management, climate change, tourism geography, health and wellbeing, Industrial and rural development etc.

Each Course has three learning outcomes, five uniform contents and references incorporating a few Hindi books wherever possible.

9.1. Structure of B.Sc. (HONS) IN GEOGRAPHY

A. Core Courses: 14 papers (14x6= 84 credits)
B. Discipline Specific Electives: 4 papers (4x6= 24 credits)
C. Generic Electives: 4 papers (4x6= 24 credits)
D. Ability Enhancement Compulsory Courses: 2 papers (2x4=8 credits)
E. Skill Enhancement Courses: 2 papers (2x4=8 credits)
GRAND TOTAL (A+B+C+D): 148 (84+24+24+8+8) credits

B.Sc. Honours in Geography

Semester- I

Course Name: Geomorphology

Course Code: BSCHGEOC101

Course Type: Core (Theoretical)	Course Details: CC-1		L-T-P: 5 - 1 - 0		
Credit: 6	Full Marks: 50	CA Marks		ESE Marks	
		Practical	Theoretical	Practical	Theoretical
		10	40

Course Learning Outcomes:

After the completion of course, the students will have ability to:

1. Understand the functioning of landform systems in real time and analyze how the natural and anthropogenic operating factors affects the development of landforms
2. Distinguish between the mechanisms that control these processes
3. Assess the role of structure, stage and time in shaping the landforms, interpret geological maps and apply the knowledge in geographical research.

Course Content:

1. Geomorphology: Definition, Nature and Scope; Fundamental Concepts; Earth: Internal Structure; Earth Movements: Isostasy (Airy and Pratt)
2. Concept of Exogenic and Endogenic Forces; Origin and types of Folds and Faults: Landform Development on Folded and Faulted Structure; Plate Tectonics: Processes and Associated Landforms; Earthquakes and Volcanoes
3. Geomorphic Processes: Weathering, Mass Wasting; Cyclic (Davis and Penck) and Non-cyclic Concept (Hack) of Landform Development
4. Landforms associated with (Erosional and Depositional): Fluvial, Karst, Aeolian, Glacial and Coastal
5. Applied Geomorphology and Environment with reference to Ground Water

Continuous Assessment: Assignment on structure and landforms

Course Name: Cartographic Techniques

Course Code: BSCHGEOC102

Course Type: Core (Practical)	Course Details: CC-2		L-T-P: 0 - 0 - 12		
Credit: 6	Full Marks: 50	CA Marks		ESE Marks	
		Practical	Theoretical	Practical	Theoretical
		30	...	20

Course Learning Outcomes:

After the completion of course, the students will have ability to:

1. Understand the importance of scale in geography.
2. Read and prepare maps, comprehend locational and spatial aspects of the earth surface.
3. Use and importance of maps for regional development and decision making.

Course Content:

1. Basic concept of Cartography; Concept and Types of Scales; Graphical Construction of Linear, Diagonal and Vernier Scales.

UG Learning Outcome Based Curriculum (LOCF) for Geography

2. Map Projections – Classification, Properties and Uses; Construction of graticules, Merits and Demerits of Polar Zenithal Stereographic, Bonne's and Mercator's Projections; Basic Concept of UTM projection.
3. Topographical Maps (Open and Defence Series maps, RF 1:50,000) – Introduction to numbering system of Topographical Maps, Analysis of Physical and Cultural features and interrelationship, Interpretation using Transect Chart (Plateau/plain region)
4. Slope Analysis (Wentworth's method), Topographic Profiles-Introduction and Plotting of Cross and Longitudinal Profiles along a River.
5. Interpretation of Weather Maps (Monsoon and Post-monsoon seasons)

Continuous Assessment:

- i. Practical Record:** A Project File / Practical Notebook in pencil comprising one exercise each, on scale, map projection, interpretation of topographic sheet and weather map (10 Marks)
- ii. Class Test:** 20 Marks

Course Name: Disaster Management

Course Code: BSCHGEOGE101

Course Type: Generic Elective (Theoretical)	Course Details: GEC-1		L-T-P: 5 - 1 - 0		
Credit: 6	Full Marks: 50	CA Marks		ESE Marks	
		Practical	Theoretical	Practical	Theoretical
		10	40

Course Learning Outcome:

After the completion of course, the students will have ability to:

1. Gain a perspective of disasters and various dimensions of disaster management
2. Have comprehensive knowledge of various natural and manmade disasters in India
3. Examine the response and mitigation measures of disasters

Course Content:

1. Disasters: Definition and Concepts; Risk and Vulnerability; Classification
2. Disasters in India: Flood: Causes, Impact, Distribution; Landslide: Causes, Impact, Distribution; Drought: Causes, Impact, Distribution
3. Disasters in India: Earthquake and Tsunami: Causes, Impact, Distribution; Cyclone: Causes, Impact, Distribution
4. Manmade Disasters: Causes, Impact, Distribution with reference to land subsidence in mining region, Industrial hazards with special reference to chemical and fire
5. Response and Mitigation to Disasters: Mitigation and Preparedness, NDMA and NIDM; Indigenous Knowledge and Community-Based Disaster Management; Do's and Don'ts During and Post-disasters

Continuous Assessment: Assignment on any one hazard

Course Name: Geography of Tourism and Pilgrimage

Course Code: BSCHGEOGE102

Course Type: Generic Elective (Theoretical)	Course Details: GEC-1		L-T-P: 5 - 1 - 0		
Credit: 6	Full Marks: 50	CA Marks		ESE Marks	
		Practical	Theoretical	Practical	Theoretical
		10	40

Course Learning Outcome:

After the completion of course, the students will have ability to:

1. Equip with a basic understanding of nature and scope, trends and patterns of various types of tourisms.
2. Have sound knowledge on geographical, environmental and socio-cultural aspects of tourism in India.
3. Apply the principles of Geo-tourism and analyse the prospects and problems associated with pilgrimage tourism.

Course Content:

1. Scope and Nature: Concepts and Issues, Tourism, Recreation and Leisure Inter-Relations; Geographical Parameters of Tourism by Robinson
2. Trends and Patterns: Nature Tourism, Cultural Tourism, Medical Tourism, Pilgrimage, Geo-tourism
3. Recent Trends of Tourism: International and Regional; Domestic (India); Eco-Tourism, Sustainable Tourism
4. Impact of Tourism: Impact on Economy, Environment, Society
5. Tourism in India: Tourism Infrastructure; Case Studies of Himalaya, Desert and Coastal Areas; India's World Heritage Sites and National Geological Monuments, National Tourism Policy

UG Learning Outcome Based Curriculum (LOCF) for Geography

Continuous Assessment: Assignment on Tourism/ Eco-tourism in West Bengal (based on secondary database or primary database of local area)

Semester-II

Course Name: Geography of Human and Cultural landscape

Course Code: BSCHGEOC201

Course Type: Core (Theoretical)	Course Details: CC-3		L-T-P: 5-1-0		
Credit: 6	Full Marks: 50	CA Marks		ESE Marks	
		Practical	Theoretical	Practical	Theoretical
		10	40

Course Learning Outcomes:

After the completion of course, the students will have ability to:

1. To Know the diversity of changing human and cultural landscape.
2. Understand of population growth and its implications.
3. Understand the diversity of culture.

Course Content:

1. Human Geography: Definition, Scope and Principles; Contemporary Relevance
2. Population: Factors, Measures and Distribution of Population Growth; Population Composition- Age and Sex; Malthusian and Demographic Transition Theories
3. Space and Society: Definition of Culture; Cultural Regions; Classification and World Distribution of Race, Religion and Language; Tribes: Jarwa, Munda, Eskimo, Masai
4. Settlements: Size, Form and Types of Rural Settlements; Classification of Urban Settlements; Trends and Patterns of World Urbanization
5. Population-Resource Relationships (Ackerman); Resource Development in India: Coal, fish and forest

Continuous Assessment: Assignment on any one tribal group.

References/ Suggested Readings:

Course Name: Statistical Method in Geography

Course Code: BSCHGEOC202

Course Type: Core (Practical)	Course Details: CC-4		L-T-P: 0-0-12		
Credit: 6	Full Marks: 50	CA Marks		ESE Marks	
		Practical	Theoretical	Practical	Theoretical
		30	20

Course Learning Outcomes:

After the completion of course, the students will have ability to:

1. Understand the basics of data collection and sampling.
2. Comprehend the representation and interpretation of the results.
3. Practice results in research.

Course Content:

1. Use of Data in Geography: Significance of Statistical Methods in Geography; Sources of Data, Scales of Measurement (Nominal, Ordinal, Interval and Ratio)
2. Frequency distribution in discrete and continuous variable: Histogram, Frequency Polygon and Ogives
3. Tabulation and Descriptive Statistics: Frequencies (Deciles, Quartiles), Cross Tabulation, Central Tendency (Mean, Median and Mode and their graphical presentation, Dispersion (Standard Deviation, Mean deviation, Variance and Coefficient of Variation)
3. Types of Sampling Techniques: Purposive, Random, Systematic and Stratified
4. Theoretical Distribution: Fundamental Concept of Probability and Normal Distributions
5. Association and Correlation: Scatter diagram, Rank Correlation, Product Moment Correlation, and Simple Regression

Continuous Assessment:

i. Practical Records:

Each student will submit a record containing five exercises:

1. Construct a data matrix (of about 10 x 10) with each row representing an areal unit (districts or villages or towns) and about 10 columns of relevant attributes of the areal units.
2. Based on the above table, a frequency table, measures of central tendency and dispersion would be computed and interpreted for any two attributes.
3. Histograms and frequency curve would be prepared for the entire data set and attempt to fit a normal curve and interpreted for one or two variables.

UG Learning Outcome Based Curriculum (LOCF) for Geography

4. From the data matrix a sample set (20 per cent) would be drawn using random-systematic and/or stratified methods of sampling and locate the samples on a map with a short note on method used.
5. Based on the sample set and using two relevant attributes, a scatter and regression line would be plotted and residual from regression would be mapped with a short interpretation. (10 Marks)

ii. **Class test:** 20 Marks

Course Name: Geospatial Information Technology

Course Code: BSCHGEOGE201

Course Type: Generic Elective (Theory)	Course Details: GEC-2		L-T-P: 5-1-0		
Credit: 6	Full Marks: 50	CA Marks		ESE Marks	
		Practical	Theoretical	Practical	Practical
		10	40

Course Learning Outcomes:

After the completion of course, the students will have ability to:

1. Learn the basic concepts of geographical information technology.
2. Acquire knowledge on data structure, interpolation, modelling, functions and working of geographical information technology
3. Apply the geographical information technology for certain purpose.

Course Content:

1. Introduction: Definitions, Concept and Historical Development of geospatial technology
2. Geospatial Data: Web data sources; Registration and projection; Data structures: Raster and Vector

UG Learning Outcome Based Curriculum (LOCF) for Geography

3. Working on spatial information system
4. Information retrieval; Topological modelling; Networks; Overlay; Data output
5. Application of Geospatial Information Technology for sustainable development of a River Basin.

Continuous Assessment: Assignment on Topological Modelling

Course Name: Human & Environment System

Course Code: BSCHGEOGE202

Course Type: Generic Elective (Theoretical)	Course Details: GEC-2		L-T-P: 5-1-0		
Credit: 6	Full Marks: 50	CA Marks		ESE Marks	
		Practical	Theoretical	Practical	Theoretical
		10	40

Course Learning Outcomes:

After the completion of course, the students will have ability to:

1. Understand the fundamental concepts of human-environment system.
2. Assess the vulnerability, risk and resilience issues associated with the human-environment interrelationships.
3. Develop possible solutions for addressing the contemporary sustainability challenges.

Course Content:

1. Concepts, components and theories of human and environment system
2. Biogeochemical cycles: CO₂, O₂, N₂; Hydrological Cycle; Interactions and impact between human and natural systems
3. Global and regional case studies: Himalaya-Ganga system; Atmosphere-water system; Surface and ground water and Coastal-water interaction
4. Integrated Assessment of Vulnerability, Risk, Resilience and Sustainability
5. Disaster Management, Governance and Policies

Continuous Assessment: Assignment on any issue related to interactions between human and natural systems and its impact on society

**Semester- III****Course Name: Climatology and Oceanography****Course Code: BSCHGEOC301**

Course Type: Core (Theoretical)	Course Details: CC-5		L-T-P: 5 - 1 - 0		
Credit: 6	Full Marks: 50	CA Marks		ESE Marks	
		Practical	Theoretical	Practical	Theoretical
		..	10	..	40

Course Learning Outcomes:

After the completion of course, the students will have ability to:

1. Understand the elements of weather and climate and its impacts at different scales.
2. Comprehend the climatic aspects and its bearing on planet earth.
3. Understand the oceanic process and availability of resources.

Course Content:

1. Atmospheric Composition and Structure: Variation with Altitude, Latitude and Season; Insolation and Temperature: Factors and Distribution; Heat Budget; Temperature Inversion
2. Atmospheric Pressure and Winds: Planetary Winds, Forces affecting Winds, General Circulation of Air, Jet Streams; Atmospheric Moisture: Evaporation, Humidity, Condensation, Fog and Clouds, Precipitation Types, Stability and Instability; Climatic Classification after Koppen and Thornthwaite (1948)
3. Cyclones: Tropical Cyclones, Temperate Cyclones; Monsoon - Origin and Mechanism with special reference to Jet Stream; El Nino and La Nina
4. Ocean Floor Topography: Pacific and Atlantic Ocean; Oceanic water Movements: Ocean Waves, Currents and Tides (Theories of origin: Progressive wave theory and stationary wave theory)
5. Ocean Salinity and Temperature: Distribution and Determinants; Coral Reefs (Darwin's theory); Marine Deposits and Ocean Resources

Continuous Assessment: Assignment on Indian Monsoon or Coral Reefs.

Course Name: Geography of India

Course Code: BSCHGEOC302

Course Type: Core (Theoretical)	Course Details: CC-6		L-T-P: 5 - 1 - 0		
Credit: 6	Full Marks: 50	CA Marks		ESE Marks	
		Practical	Theoretical	Practical	Theoretical
		..	10	..	40

Course Learning Outcomes:

After the completion of course, the students will have ability to:

1. Understand the physical profile of the country
2. Study the resource endowment and its spatial distribution and utilization for sustainable development
3. Synthesise and develop the idea of regional dimensions at present.

Course Content:

1. Physical Geography of India: Location, Physiographic Divisions; Characteristics and classification of Climate; Soil and Natural vegetation distribution
2. Population of India: Age-sex Structure; Growth and Distribution of Population; Distribution of Population by Race, Caste, Religion, Language, Tribes and their Correlates
3. Economic Geography of India: Mineral and Power Resources: Distribution and Utilization of Iron Ore, Coal, Petroleum, Natural Gas; Agricultural Production and Distribution of Rice, Wheat, Jute, Tea, Cotton
4. Regionalisation of India: Physiographic (R. L. Singh), Socio-Cultural (Sopher), Economic (Sengupta)
5. Spatial Patterns of Industrial Development of India: Automobile and Information Technology

Continuous Assessment: Assignment on any one macro physiographic region of India.

Course Name: Fundamentals of Remote Sensing

Course Code: BSCHGEOC303

Course Type: Core (Practical)	Course Details: CC-7		L-T-P: 0 - 0 - 12		
Credit: 6	Full Marks: 50	CA Marks		ESE Marks	
		Practical	Theoretical	Practical	Theoretical
		30	20	..

Course Learning Outcomes:

After the completion of course, the students will have ability to:

1. Appreciate the strength and application of remote sensing
2. Map the resources, their location and availability using GIS software.
3. Apply this knowledge for sustainable development at local to global level.

Course Content:

1. Remote Sensing: Definition, Development, Platforms and Types

UG Learning Outcome Based Curriculum (LOCF) for Geography

2. Concept of Aerial Photography and Satellite Remote Sensing: Principles, Types and Geometry of Aerial Photograph; Satellites – geostationary and remote sensing (Landsat and IRS) and Sensors, Resolution (Spectral, spatial and temporal)
3. Introduction to Image Processing and Data Analysis: Geo-Referencing; Editing and Output
4. Land use/ Land Cover Mapping: Visual Interpretation of Aerial photographs and Satellite Images
5. Application of Remote Sensing: Forests Monitoring, Water Resources and Natural hazards.

Continuous Assessment:

- i. Practical Record:** A project file consisting of one exercise will be done from aerial photos (scale, orientation and interpretation) and one exercise on using latest version of QGIS software on above mentioned themes in topic 3 and one exercise on topic 4. (10 Marks)
- ii. Class Test:** 20 Marks

UG Learning Outcome Based Curriculum (LOCF) for Geography

Course Name: Geographic Information System

Course Code: BSCHGEOSE301

Course Type: Skill Enhancement (Practical)	Course Details: SEC-1		L-T-P: 0 - 0 - 8		
Credit: 4	Full Marks: 50	CA Marks		ESE Marks	
		Practical	Theoretical	Practical	Theoretical
		30	..	20	..

Course Learning Outcomes:

After the completion of course, the students will have ability to:

1. Understand various components and principles of GIS
2. Construct the thematic maps using different digital layers
3. Apply GIS in various geographical studies

Course Content:

1. Geographical Information System (GIS): Definition and Components.
2. Global Positioning System (GPS): Principles and Uses.
3. GIS Data Structures: Types (spatial and non-spatial), Raster and Vector Data Structure.
4. GIS Data Analysis: Input; Geo-Referencing; Editing, Output and Query; Overlays.
5. Application of GIS: Land Use Mapping highlighting the open cast collieries in Paschim Bardhaman District, Representation of Socio-economic Data-Choropleth, Bar Graph

Continuous Assessment:

i. Practical Record: A project file consisting of 3 exercises using latest version of QGIS Software on above mentioned themes and preparation of map using GPS (10 Marks)

ii. Class Test: 20 Marks

UG Learning Outcome Based Curriculum (LOCF) for Geography

10. Singh, R.B. and Murai, S. (1998) *Space Informatics for Sustainable Development*, Oxford and IBH, New Delhi.

Course Name: Spatial Statistical Techniques

Course Code: BSCHGEOSE302

Course Type: Skill Enhancement (Practical)	Course Details: SEC-1		L-T-P: 0 - 0 - 8		
Credit: 4	Full Marks: 50	CA Marks		ESE Marks	
		Practical	Theoretical	Practical	Theoretical
		30	...	20	...

Course Learning Outcomes:

After the completion of course, the students will have ability to:

1. Understand the basics of data collection and, processing for the meaningful outcomes
2. Understand the selection of proper sampling techniques for the collection of data
3. Put into practice the results obtained for spatial analysis of results and to apply various statistical softwares for the study

Course Content:

1. Statistics and Statistical Data: Spatial and non-spatial
2. Probability theory, probability density functions with respect to Normal, Binomial and Poisson distributions and their geographical applications
3. Sampling plans for spatial and non-spatial data, sampling distributions; sampling estimates for large and small samples tests involving means and proportions
4. Correlation and Regression Analysis: Rank order correlation and product moment correlation; linear regression, residuals from regression, Introduction to multi-variate regression and correlation analysis (partial and multiple)
5. Time Series Analysis: Time Series processes -Semi average, moving average and least square method

Note: MS Excel to be used for practice.

Continuous Assessment:

- Practical Record:** A project file consisting of any 5 exercises using MS Excel on above mentioned themes (10 Marks)
- Class Test:** 20 Marks

Course Name: Geographical Techniques

Course Code: BSCHGEOSE303

Course Type: Skill Enhancement (Practical)	Course Details: SEC-1		L-T-P: 0-0-8		
Credit: 4	Full Marks: 50	CA Marks		ESE Marks	
		Practical	Theoretical	Practical	Theoretical
		30	20

Course Learning Outcomes:

After the completion of course, the students will have ability to:

1. Gain knowledge about drawing of longitudinal sections and interpretation of structure of the geological maps.
2. Predict Soil fertility (NPK, pH).
3. Acquire practical knowledge about the application of various metrological instruments.
4. Interpret and predict the climatic condition of an area.

Course Content:

1. Geological map: Analysis of geological maps (Horizontal, Uniclinal and folded structure along with intrusions and unconformities)
2. Identification of rocks and minerals: granite, basalt, dolerite, pegmatite, limestone, shale, sandstone, phyllite, slate, conglomerate, laterite, marble, schist, quartzite, bauxite, gypsum, calcite, chalcopryrite, feldspar, galena, haematite, magnetite, mica, quartz and talc
3. Measurement of soil nutrient (NPK) and Soil pH by using soil kit
4. Measurement of weather elements by Meteorological Instruments: Hygrometer, Maximum Minimum Thermometer, Fortin's barometer, Rain gauge (Simon's)
5. Preparation of Climatic Graphs and Charts: Taylor's Climograph, Hythergraph, Star Diagram and Ergograph

Continuous Assessment:

- i. **Practical Record:** A project file covering all practical topics must be prepared (10 Marks).

ii. **Class Test:** 20 Marks

Course Name: Climate Change, Vulnerability and Adaptation

Course Code: BSCHGEOGE301

Course Type: Generic Elective (Theoretical)	Course Details: GEC-3		L-T-P: 5 - 1 - 0		
Credit: 6	Full Marks: 50	CA Marks		ESE Marks	
		Practical	Theoretical	Practical	Theoretical
		...	10	...	40

Course Learning Outcomes:

After the completion of course, the students will have ability to:

1. Understand the foundational concepts of climate change and its impacts.
2. Assess the human and environmental vulnerability to climate change.
3. Learn the various adaptation and mitigation for reducing the impacts of climate change and national action plan.

Course Content:

1. Climate Change: Understanding Climate Change; Greenhouse Gases and Global Warming; Global Climatic Assessment- IPCC

UG Learning Outcome Based Curriculum (LOCF) for Geography

2. Climate Change and Vulnerability: Physical Vulnerability; Economic Vulnerability; Social Vulnerability
3. Impact of Climate Change: Agriculture and Water; Biodiversity; Human Health
4. Adaptation and Mitigation: Global Initiatives with Particular Reference to South Asia
5. National Action Plan on Climate Change in India and Role of Local Institutions (Urban Local Bodies, Panchayats)

Continuous Assessment: Assignment on impact of climate change.

Course Name: Rural Development

Course Code: BSCHGEOGE302

Course Type: Generic Elective (Theoretical)	Course Details: GEC-3		L-T-P: 5 - 1 - 0		
Credit: 6	Full Marks: 50	CA Marks		ESE Marks	
		Practical	Theoretical	Practical	Theoretical
	...	10	...	40	

Course Learning Outcomes:

After the completion of course, the students will have ability to:

1. Appreciate the concepts, needs and various approaches to rural development;
2. Understand the strong economic bases of rural areas of India;
3. Appreciate the area based and target group-based approaches and provision of services to rural development.

Course Content:

1. Defining Development: Inter-Dependence of Urban and Rural Sectors of the Economy; Need for Rural Development; Gandhian Approach of Rural Development
2. Rural Economic Base: Panchayati Raj System, Agriculture and Allied Sectors, Seasonality and Need for Expanding Non-Farm Activities, Co-operatives, PURA
3. Area Based Approach to Rural Development: Drought Prone Area Programmes, Rural Connectivity -PMGSY
4. Target Group Approach to Rural Development: SJGSY, MGNREGA and Jan Dhan Yojana
5. Provision of Rural Services in India – Physical and Socio-Economic Access to Elementary Education and Primary Health Care and Micro credit

Continuous Assessment: Assignment on any one rural development programme

Semester-IV

Course Name: Introduction to Global Economic System

Course Code: BSCHGEOC401

Course Type: Core (Theoretical)	Course Details: CC-8		L-T-P: 5-1-0		
Credit: 6	Full Marks: 50	CA Marks		ESE Marks	
		Practical	Theoretical	Practical	Theoretical
		10	40

Course Learning Outcomes:

After the completion of course, the students will have ability to:

1. Know different types of economic activities and their utilities.
2. Understand the theories that are relevant to contemporary world.
3. Examine the importance of economic initiatives that are crucial to development.

Course Content:

1. Introduction to Global Economic System; Concept and Classification of Economic Activities
2. Theories: Agricultural location theory (Von Thunen); Theory of Industrial location (Weber's and Losch theory)
3. Primary Activities: Types of Agriculture, Forestry, Fishing and Mining activities
4. Secondary Activities: Global distribution of Manufacturing activities (Cotton Textile, Iron and Steel), Concept of Manufacturing Regions; Special Economic Zones and Technology Parks
5. Tertiary Activities: Role of Transport, Trade and Service in Economic Development

Continuous Assessment: Assignment on Eco-farming/agro-based activities

References/ Suggested Readings:

1. Alexander, J. W., (1963): *Economic Geography*, Prentice-Hall Inc., Englewood Cliffs, New Jersey.
2. Bagchi-Sen, S. and Smith, H. L., (2006): *Economic Geography: Past, Present and Future*, Taylor and Francis.

UG Learning Outcome Based Curriculum (LOCF) for Geography

Course Name: Environment and Natural Resource Management

Course Code: BSCHGEOC402

Course Type: Core (Theoretical)	Course Details: CC-9		L-T-P: 5-1-0		
Credit: 6	Full Marks: 50	CA Marks		ESE Marks	
		Practical	Theoretical	Practical	Theoretical
		...	10	...	40

Course Learning Outcomes:

After the completion of course, the students will have ability to:

- 1. Understand the relationship between man and environment.*
- 2. Have good understanding on distribution, utilization and proper management of natural resources.*
- 3. Know about the necessities that are pre-requisite for assessment and review of planning and policies.*

Course Content:

1. Concept of Environment and Natural Resource Management, Human-Environment Relationships
2. Ecosystem: Concept, Structure and Functions; Environmental Issues in Tropical, Temperate and Polar Ecosystems
3. Natural Resource: Concept, Classification; Distribution, Utilisation, Problems and Management of Land, Water, Forests and Energy
4. Conservation of Environment and Natural Resources with special reference to Soil, Water, Forest; Sustainable Resource Development
5. Environmental Monitoring Programme: Policies – Global, National and Local

Continuous Assessment: Assignment on Local Environmental Issues

References/ Suggested Readings:

1. Chandna, R. C., (2002): *Environmental Geography*, Kalyani, Ludhiana.

Course Name: Digital Remote Sensing

Course Code: BSCHGEOC403

Course Type: Core (Practical)	Course Details: CC-10		L-T-P: 0-0-12		
Credit: 6	Full Marks: 50	CA Marks		ESE Marks	
		Practical	Theoretical	Practical	Theoretical
		30	20

Course Learning Outcomes:

After the completion of course, the students will have ability to:

1. Develop the skill so as to use digital satellite data using software
2. Prepare the maps based with satellite data to compare with the ground realities.
3. Classify digital data for the land use/land cover and urban studies

Course Content:

1. EMR Interaction with Atmosphere and Earth Surface; Concept of Image Processing (Digital and Visual): Pre-processing (Atmospheric, Radiometric and Geometric Correction); Enhancement (Filtering); Classification (Supervised and Un-supervised)
2. Digital Image Processing and Interpretation
3. Application of Digital Remote Sensing: Land Use /Land Cover Mapping and Interpretation
4. Application of Digital Remote Sensing in Urban Studies with special reference to Urban Sprawl Analysis, Mapping and Interpretation
5. Application of Remote Sensing in weather (tropical cyclones) studies and natural hazards (floods)

Continuous Assessment:

- i. **Practical Record:** A project file consisting of 3 exercises on topic 2, 3 and 4 (10Marks)
- ii. **Class Test:** 20 Marks

References/ Suggested Readings:

1. Bhatta, B., (2008): *Remote Sensing and GIS*, Oxford University Press, New Delhi.
2. Campbell, J. B., (2007): *Introduction to Remote Sensing*, Guildford Press
3. Chauniyal, D., (2010): *Sudur Samvedana Avam Bhaugolik Suchna Pranali*, Sharda Pustak Bhawan, Allahabad.
4. Hord R.M.,(1989): *Digital Image Processing of Remotely Sensed Data*, Academic, New York.
5. Jensen, J. R., (2005): *Introductory Digital Image Processing: A Remote Sensing Perspective*, Pearson Prentice-Hall.
6. Jensen, J. R.,(2007): *Remote Sensing of the Environment: An Earth Resource Perspective*, Prentice-Hall Inc, New Jersey.
7. Joseph, G.,(2005): *Fundamentals of Remote Sensing*, United Press India.

Course Name: Introduction to GI Science

Course Code: BSCHGEOSE401

Course Type: Skill Enhancement (Practical)	Course Details: SEC-2			L-T-P: 0-0-8	
Credit: 4	Full Marks: 50	CA Marks		ESE Marks	
		Practical	Theoretical	Practical	Theoretical
		30	...	20	...

Course Learning Outcomes:

After the completion of course, the students will have ability to:

1. Have comprehensive understanding of GIS.
2. Have knowledge of using GPS & DGPS for the accurate location
3. Apply the GIScience platform for map making.

Course Contents:

1. Evolution of GIScience, Institutions and GI data sharing, GIS: Definition and Components
2. Global Positioning System (GPS) – Principles and Uses
3. GIS Data Structures: Types (spatial and Non-spatial), Raster and Vector Data Structure, Overlays – Point, Line and Areal Data
4. GIS Data Analysis: Input; Geo-Referencing; Editing, Query
5. Application of GIS: Land Use Mapping; Forests Monitoring and Natural Disaster

Continuous Assessment:

- i. **Practical Record:** A project file consisting of 5 exercises on using any GIS Software on above mentioned themes (10Marks)
- ii. **Class Test:** 20 Marks

References/ Suggested Readings:

1. Bhatta, B., (2010): *Analysis of Urban Growth and Sprawl from Remote Sensing*, Springer, Berlin Heidelberg 41

8. Sarkar, A., (2015): *Practical geography: A systematic approach*, Orient Black Swan Private Ltd., New Delhi
9. Singh, R.B. and Murai, S., (1998): *Space Informatics for Sustainable Development*, Oxford and IBH, New Delhi.

Course Name: Thematic Atlas

Course Code: BSCHGEOSE402

Course Type: Skill Enhancement (Practical)	Course Details: SEC-2		L-T-P: 0-0-8		
Credit: 4	Full Marks: 50	CA Marks		ESE Marks	
		Practical	Theoretical	Practical	Theoretical
		30	...	20	...

Course Learning Outcomes:

After the completion of course, the students will have ability to:

1. Have sound knowledge regarding the classification and elements of maps.
2. Have proper utilization of maps for explaining geographical issues.
3. Know the methods of preparation of various thematic maps.

Course Content:

1. Maps – Classification and Types; Principles of Map Design
2. Diagrammatic Data Presentation – Line Graph, Bar Graph, Proportional Circle, Pie Graph
3. Thematic Mapping Techniques – Properties, Uses and Limitations; Areal Data -Choropleth, Dot, Proportional Sphere; Isopleths map
4. Cartographic Overlays – Point, Line and Areal Data
5. Rainfall dispersion diagram, Line graph showing trend of population growth, β index map

Continuous Assessment:

i. Practical Record: A Thematic Atlas should be prepared on a specific theme with at least five plates for any state in India. (10Marks)

ii. Class Test: 20 Marks

Course Name: Industrial Development

Course Code: BSCHGEOGE401

Course Type: Generic Elective (Theoretical)	Course Details: GEC-4		L-T-P: 5-1-0		
Credit: 6	Full Marks: 50	CA Marks		ESE Marks	
		Practical	Theoretical	Practical	Theoretical
	10	40	

Course Learning Outcomes:

After the completion of course, the students will have ability to:

1. Understand the factors responsible for location of an industry.
2. Differentiate various types of industries and gain knowledge about industrial regions and policies of India.
3. Understand the socio- economic and environmental implications of various types of industries.

Course Content:

1. Nature and Scope of Industrial Geography

UG Learning Outcome Based Curriculum (LOCF) for Geography

2. Types, Geographical Characteristics and Location of Industries, Weber's Theory of Industrial Location
3. Small, Medium and Heavy Industries: Coal and Iron based industries, Agro-based Industries, Footloose Industry
4. Mega Industrial Complexes: National Capital Region, Mumbai-Pune Industrial Region, Bengaluru-Chennai Industrial Region and Chota-Nagpur Industrial Region
5. Industrial Policy of India, Impact of Industrialisation in India

Continuous Assessment: Assignment on Environmental impact of any given industry.

Course Name: Sustainable Resource Development

Course Code: BSCHGEOGE402

Course Type: Generic Elective (Theoretical)	Course Details: GEC-4		L-T-P: 5-1-0		
Credit: 6	Full Marks: 50	CA Marks		ESE Marks	
		Practical	Theoretical	Practical	Theoretical
		10	40

Course Learning Outcomes:

After the completion of course, the students will have ability to:

1. Understand difficulties in defining the components of sustainable development in different contexts.
2. Distinguish the patterns of regional development of the world and the need for sustainable development plan.
3. Critically analyse the efforts and initiatives of the Governments in reducing the levels of poverty and inequality among the people of various countries.

Course Content:

1. Sustainable Resource Development: Definition, Components and Limitations
2. The Millennium Development Goals: National Strategies and International Experiences
3. Sustainable Regional Development: Need and examples from different Ecosystems

UG Learning Outcome Based Curriculum (LOCF) for Geography

4. Inclusive Development: Poverty and Inequality; Education, Health; The role of higher education in sustainable resource development; The Challenges of Universal Health Coverage
5. Sustainable Development Policies and Programmes: Goal-Based Development; Sustainable Development Goals; Financing for Sustainable Development; Principles of Good Governance; National Environmental Policy, Clean Development Mechanism

Continuous Assessment: Assignment on Sustainable Development Goals

References/ Suggested Readings:

**Semester- V****Course Name: Regional Planning and Sustainable Development****Course Code: BSCHGEOC501**

Course Type: Core (Theoretical)	Course Details: CC-11		L-T-P: 5 - 1 - 0		
Credit: 6	Full Marks: 50	CA Marks		ESE Marks	
		Practical	Theoretical	Practical	Theoretical
	...	10	...	40	

Course Learning Outcomes:

After the completion of course, the students will have ability to:

1. Identify notable backward regions and solutions for their overall development
2. Have comprehensive understanding regarding the different regions and application of different models and theories for integrated regional development.
3. Select appropriate indicators for the measurement of socio-economic regional development.

Course Content:

1. Concept of Region; Formal, Functional, and Planning Regions; Evolution, Need and Types of Regional Planning
2. Choice of a Region for Planning: Characteristics of Planning Region; Delineation of Planning Region; Regionalization of India for Planning, Agro- Ecological Zones
3. Theories and Models for Regional Planning: Myrdal, Hirschman, Rostow and Friedman; Growth Pole Model of Perroux; Village Cluster
4. Sustainable Development: Concept of Development and Underdevelopment; Efficiency-Equity Debate: Definition, Components and Sustainability for Development. Indicators (Economic, Social and Environmental)
5. Sustainable Development Policies and Programmes: Rio+20; Goal-Based Development; Financing for Sustainable Development

Continuous Assessment: Assignment on Sustainable Development Programme.

Course Name: Field Techniques, Surveying and Research Methods

Course Coe: BSCHGEOC502

Course Type: Core (Practical)	Course Details: CC-12		L-T-P: 0 - 0 - 12		
Credit: 6	Full Marks: 50	CA Marks		ESE Marks	
		Practical	Theoretical	Practical	Theoretical
		30	...	20	...

Course Learning Outcomes:

After the completion of course, the students will have ability to:

1. Conduct proper field work for the collection of primary data to bring out grassroots realities.
2. Make use of proper tools and surveying methods for measurement in context of collection and processing of data.
3. Prepare a report based on field data.

Course Content:

1. Meaning, Significance, Types and Approaches to Research in Geography; Literature review; Field Work in Geographical Studies –Defining the Field and Identifying the Case Study
2. Research Design: Identification of Research Problem; Research questions. Data Collection: Type and Sources of Data; Methods of Collection; Data Analysis, Data Representation Techniques
3. Field Techniques – Merits, Demerits and Selection of the Appropriate Technique; Observation (Participant / Non-Participant), Questionnaires (Open/ Closed / Structured / Non-Structured)
4. Surveying Use of Field Tools: Dumpy level, Prismatic Compass, Theodolite
5. Designing the Field Report – Aims and Objectives, Methodology, Analysis, Interpretation and Writing the Report

Continuous Assessment:

i. Practical Record: Field Survey and Report (20 Marks)

1. Each student will prepare an individual report based on primary and secondary data collected during fieldwork.
2. The duration of the fieldwork should not exceed 10 days.
3. The word count of the report (hand written) should be about 5000 to 8000 excluding figures, tables, photographs, maps, references and appendices. Total pages of the report have to be within 25 pages.
4. One copy of the report on A 4 size paper should be submitted in soft binding.

ii. Class Test: 10 Marks

Course Name: Geography of West Bengal

Course Code: BSCHGEODSE501

Course Type: Discipline Specific Elective (Theoretical)	Course Details: DSEC-1		L-T-P: 5 - 1 - 0		
Credit: 6	Full Marks:	CA Marks		ESE Marks	
		Practical	Theoretical	Practical	Theoretical
	50	10	40

Course Learning Outcomes:

After the completion of course, the students will have ability to:

1. Understand physical geography of West Bengal and availability of resources
2. Understand the demography, economy and regional issues of West Bengal

UG Learning Outcome Based Curriculum (LOCF) for Geography

3. Assess the developmental problems of West Bengal in the context of future planning

Course Content:

1. Physiography of West Bengal: Physiography and Broad Physiographic Division, Climate, Drainage System and Ground Water, Soil and Forest resources
2. Demography of West Bengal: Population Composition (age, sex, literacy, religion and caste) Population Growth and distribution, Urbanization (Characteristics and Pattern)
3. Economy of West Bengal: Irrigation and Agriculture, Mining, Industries and transport development
4. Developmental Perspective of Special Regions in West Bengal: Darjeeling Hill Region, Paschimanchal Region, Sundarban Region
5. Developmental Problems and Potentials of West Bengal: Deforestation and Joint Forest Management, Special Economic Zones, Regional Dimension of Human Development

Continuous Assessment: Assignment on any developmental issues of West Bengal.

Course Name: Agriculture and Food Security

Course Code: BSCHGEODSE502

Course Type: Discipline Specific Elective (Theoretical)	Course Details: DSEC-1		L-T-P: 5 - 1 - 0		
Credit: 6	Full Marks: 50	CA Marks		ESE Marks	
		Practical	Theoretical	Practical	Theoretical
	10	40	

Course Learning Outcomes:

After the completion of course, the students will have ability to:

1. Conceptualise the agriculture and its determinants.
2. Get the overview of Indian and World agriculture regions and systems.
3. Have sound knowledge of agriculture revolutions and food security

UG Learning Outcome Based Curriculum (LOCF) for Geography

Course Content:

1. Agriculture and Food Security: Defining the field, Introduction, nature and scope; Concept of land and soil; Land use/ land cover definition and classification (Stamp and FAO)
2. Physical, Technological and Institutional Determinants of Agriculture
3. Agricultural Regions of India: Agro-climatic, Agro-ecological & Crop Combination Regions
4. Agricultural Systems of the World (Whittlesey's classification) and Agricultural Land use model (Von Thunen, modification and relevance)
5. Food Security: Concept, approaches, pattern, Indian revolutions in agriculture and government policies related to food security

Continuous Assessment: Assignment on problems and prospects of Indian agriculture.

Course Name: Population Geography

Course Code: BSCHGEODSE503

Course Type: Discipline Specific Elective (Theoretical)	Course Details: DSEC-2		L-T-P: 5 - 1 - 0		
Credit: 6	Full Marks : 50	CA Marks		ESE Marks	
		Practical	Theoretical	Practical	Theoretical
		...	10	40

Course Learning Outcomes:

After the completion of course, the students will have ability to:

1. Learn the role of demography and population studies as a distinct field of human geography

UG Learning Outcome Based Curriculum (LOCF) for Geography

2. Have sound knowledge of key concept, different components of population along with its drivers
3. Examine population dynamics and characteristic with contemporary issues

Course Contents:

1. Population Geography, Demography and Population Studies: Defining the Field, Nature and Scope; Sources of Data with special reference to India (Census, Vital Statistics and NSS)
2. Population Size, Distribution and Growth – Determinants and Patterns; Theories of Growth – Malthusian Theory and Demographic Transition Theory; Mobility Transition Theory
3. Population Dynamics: Fertility, Mortality and Migration – Measures, Determinants and Implications
4. Population Composition and Characteristics – Age-Sex Composition; Rural and Urban Composition; Literacy
5. Contemporary Issues – Ageing of Population; Child labour; Declining Sex Ratio

Continuous Assessment: Assignment on any one contemporary population issue in India.

UG Learning Outcome Based Curriculum (LOCF) for Geography

Course Name: Hydrology

Course Code: BSCHGEODSE504

Course Type: Discipline Specific Elective (Theoretical)	Course Details: DSEC-2		L-T-P: 5 - 1 - 0		
Credit: 6	Full Marks : 50	CA Marks		ESE Marks	
		Practical	Theoretical	Practical	Theoretical
	...	10	40	

Course Learning Outcomes:

After the completion of course, the students will have ability to:

- 1. Understand the basic components of hydrological cycle and comprehend practices of integrated watershed management.*
- 2. Evaluate the water balancing and river basin and water disputes.*
- 3. Study the soil as a basic resource, focusing its distribution, problems and management.*

Course Content:

1. Hydrological Cycle: Systems approach in hydrology, Basin and Global hydrological cycle, human impact on the hydrological cycle
2. Precipitation, interception, evaporation, evapotranspiration, infiltration, ground-water, runoff and runoff cycle
3. Water Balance: input and output; floods and droughts; Integrated water resource management.
4. River Basin: Characteristics and problems of river basins, basin surface run-off, and measurement of river discharge. Watershed management - with reference to DVC.
5. River Water Dispute: Kaveri and Teesta river water dispute: River linkages in India – merits and demerits

Continuous Assessment: Assignment on River Basin Management.

**Semester-VI****Course Name: Evolution of Geographical Thought****Course Code: BSCHGEOC601**

Course Type: Core (Theoretical)	Course Details: CC-13		L-T-P: 5-1-0		
Credit: 6	Full Marks: 50	CA Marks		ESE Marks	
		Practical	Theoretical	Practical	Theoretical
		10	40

Course Learning Outcomes:

After the completion of course, the students will have ability to:

1. Understand paradigms in geography discipline through time
2. Understand the development of geographical thinking.
3. understand the past and future trends of geography as a discipline.

Course Content:

1. Pre-Modern Geography– Early Origins of Geographical Thinking with reference to the Greek, Roman and Arab Thinkers (Ancient and Medieval)
2. Modern Geography – Evolution of Geographical Thinking and Disciplinary Trends in Germany, France, Britain, United States of America
3. Debates between Environmental Determinism and Possibilism, Systematic and Regional Geography, Ideographic and Nomothetic approach in Geography
4. Paradigms and Paradigm shift in Geography: Quantitative to Critical Revolution, Modernism to Post Modernism
5. Recent Trends –Systems Approach, Radicalism, Feminism; Concept of Space in Geography, Future of Geography

Continuous Assessment: Class Test

Course Name: Disaster Management Project Work

Course Code: BSCHGEOC602

Course Type: Core (Practical)	Course Details: CC-14		L-T-P: 0-0-12		
Credit: 6	Full Marks: 50	CA Marks		ESE Marks	
		Practical	Theoretical	Practical	Theoretical
		30	20

Course Learning Outcomes:

After the completion of course, the students will have ability to:

1. Understand processes and impact of disaster on empirical basis.
2. Distinguish both the natural and man-made disaster.
3. Design and prepare project work on disasters.

Course Content:

The Project Report based on any two field-based case studies among following disasters and one disaster preparedness plan of respective college/locality and district:

1. Flood
2. Drought
3. Cyclone and Hailstorms
4. Earthquake and Volcanoes
5. Landslides
6. Human Induced Disasters: Fire Hazards, Chemical, Industrial accidents

Continuous Assessment: Assessment of the project report and Presentation (PPT/ Poster)

i) Practical Record: (Project Report): (15 +15 Marks)

Two Project Reports (case study) based on two different hazards listed above have to be prepared. At least one report has to be based on field study and contain a disaster preparedness plan.

Each Report must be typed on A4 page containing 2000 to 3000 words with necessary maps and diagrams. The total pages of the report have to be within 12 pages.

ii) End Semester Evaluation will be based on project report and viva.

Course Name: Geography of Health

Course Code: BSCHGEODSE601

Course Type: Discipline Specific Elective (Theoretical)	Course Details: DSEC-3		L-T-P: 5 - 1 - 0		
Credit: 6	Full Marks : 50	CA Marks		ESE Marks	
		Practical	Theoretical	Practical	Theoretical
		...	10	40

Course Learning Outcomes:

After the completion of course, the students will have ability to:

1. Understand the key concepts related to health.
2. Identify the linkages between the health and environment.
3. Explain the relationships between health and environment with reference to climate change

Course Content:

1. Perspectives on Health: Definition; linkages with environment, development and health; driving forces in health and environmental trends - population dynamics, urbanization, poverty and inequality

UG Learning Outcome Based Curriculum (LOCF) for Geography

2. Pressure on Environmental Quality and Health: Human activities and environmental pressure land use and agricultural development; industrialisation
3. Exposure and Health Risks: Air and water pollution; household wastes
4. Health and Disease Pattern in Environmental Context with special reference to India, Types of Diseases and their regional pattern (Communicable and Lifestyle related diseases)
5. Climate Change and Human Health: Changes in climate system – heat and cold; Biological disease agents; food production and nutrition

Continuous Assessment: Class Test

UG Learning Outcome Based Curriculum (LOCF) for Geography

Course Name: Political Geography

Course Code: BSCHGEODSE602

Course Type: Discipline Specific Elective (Theoretical)	Course Details: DSEC-3		L-T-P: 5 - 1 - 0		
Credit: 6	Full Marks : 50	CA Marks		ESE Marks	
		Practical	Theoretical	Practical	Theoretical
		...	10	40

Course Learning Outcomes:

After the completion of course, the students will have ability to:

1. Learn the concept of nation and state and geopolitical theories
2. Understand the different dimensions of resource conflicts on geopolitical base.
3. Acquire sound knowledge on politics of contemporary displacement.

Course Content:

1. Introduction: Concepts, Nature and Scope of political geography.
2. State, Nation and Nation State – Concept of Nation and State, Attributes of State – Frontiers, Boundaries, Shape, Size, Territory and Sovereignty, Concept of Nation State; Geopolitics; Theories (Heartland and Rimland)
3. Electoral Geography – Geography of Voting, Geographic Influences on Voting pattern, Geography of Representation
4. Political Geography of Resource Conflicts – Water Sharing Disputes, Disputes and Conflicts Related to Forest Rights and Minerals
5. Politics of Displacement: Issues of relief, compensation and rehabilitation: with reference to Dams and Mining

Continuous Assessment: Class Test

Course Name: Biogeography

Course Code: BSCHGEODSE603

Course Type: Discipline Specific Elective (Theoretical)	Course Details: DSEC-3		L-T-P: 5 - 1 - 0		
Credit: 6	Full Marks : 50	CA Marks		ESE Marks	
		Practical	Theoretical	Practical	Theoretical
	...	10	40	

Course Learning Outcomes:

After the completion of course, the students will have ability to:

1. Familiarise the dynamics of climate and related theories.
2. Understand of Vegetation as an index of climate.
3. Assess of different aspects of floral and faunal provinces.

Course Content:

1. Introduction to Bio-geography: Nature, scope, and contents
2. Biogeographical regions of the world
3. Definition of biosphere, meaning of ecology, Eco-tone, Communities, habitats, ecological niche, Biomes, ecological pyramids
4. Ecological successions: stages and climax
5. Biodiversity; bio-diversity hotspots, biodiversity conservation: Tiger and elephant conservation in India

Continuous Assessment: Class Test

Course Name: Geography of Social Wellbeing

Course Code: BSCHGEODSE604

Course Type: Discipline Specific Elective (Theoretical)	Course Details: DSEC-4		L-T-P: 5 - 1 - 0		
Credit: 6	Full Marks : 50	CA Marks		ESE Marks	
		Practical	Theoretical	Practical	Theoretical
	...	10	40	

Course Learning Outcomes:

After the completion of course, the students will have ability to:

1. Understand the nature, scope and relationships of geography and human wellbeing.
2. Understand the spatial dimensions of social diversity components.
3. Critically analyse the social welfare programs related to inclusive and exclusive policies in India.

Course Content:

1. Geography of Social Wellbeing: Concept, Origin, Nature and Scope
2. Social Diversity: Caste, Religion, Race and Gender and their spatial distribution
3. Social Wellbeing and Inclusive Development: Concept and Components – Healthcare, Housing and Education
4. Social Geographies of Inclusion and Exclusion, Slums, Gated Communities, Communal Conflicts and Crime
5. Social welfare program and policies with special reference to India

Continuous Assessment: Assignment on Social Welfare Programme in India

Course Name: Urbanization and Urban System

Course Code: BSCHGEODSE605

Course Type: Discipline Specific Elective (Theoretical)	Course Details: DSEC-4		L-T-P: 5 - 1 - 0		
Credit: 6	Full Marks : 50	CA Marks		ESE Marks	
		Practical	Theoretical	Practical	Theoretical
		...	10	40

Course Learning Outcomes:

After the completion of course, the students will have ability to:

1. Understand the fundamentals and patterns of urbanization process
2. Learn the functional classification of cities and Central Place Theory
3. Know contemporary problems of Delhi, Mumbai, Kolkata and Chennai

Course Content:

1. Urban Geography: Introduction, Nature and Scope and Approaches
2. Patterns of Urbanisation in India, Developed and Developing countries
3. Functional classification of cities: Quantitative and Qualitative Methods
4. Cities and Central Place Theory: Christaller and Lössch
5. Urban Issues: problems of housing, slums, basic amenities (water and transport); Case studies of Delhi, Kolkata, Asansol

Continuous Assessment: Assignment on any one urban problem.

Course Name: Soil Geography

Course Code: BSCHGEODSE606

Course Type: Discipline Specific Elective (Theoretical)	Course Details: DSEC-4		L-T-P: 5 - 1 - 0		
Credit: 6	Full Marks : 50	CA Marks		ESE Marks	
		Practical	Theoretical	Practical	Theoretical
	...	10	40	

Course Learning Outcomes:

After the completion of course, the students will have ability to:

1. Understand the concepts related to soil.
2. To know the soil diversities and importance of their preservation
3. To know about soil fertility and its significance

Course Content:

1. Concept of soil, pedology, and pedogenic processes, soil functions, Physical and chemical properties of soil: Texture, Structure, pH, Organic matter
2. Factors of soil development, Concept of soil profile, profile development of zonal soils: Laterite, Chernozem and Podzol
3. Concept of soil fertility, factors affecting fertility and fertility improvement methods.
4. Soil erosion, soil degradation, need and strategies of soil conservation, distribution and characteristics of Indian soils
5. USDA classification of Soils, types of soil survey

Continuous assessment: Assignment on fertility improvement methods based on the survey of a rural Mouza.
